

Web Design Pricing

These are guidelines only.

We are not registered for VAT, so prices exclude VAT.

Using Framesets (windows), or having the look and feel of framesets:

To design the basic skeleton of the site R2,500 to R5,000.00

To populate the skeleton with content — the provision of content is the site owner's responsibility. The layout and visual appeal of the content would be our responsibility. From R1,500.00

The site owner must provide any graphics and pictures to be published in electronic format. If we are asked to create or design these, that will be at additional cost.

If you have an existing database price-list it should be easy to generate .pdf price lists. Again, if we are asked to assist, this is an extra cost.

Using Pull-down menus:

Basic design R3,000 to R5,000.00

Technology costs for menus - on request

Using PHP and database:

Pricing on request.

As stated above, these prices are guidelines. If your organisation is a church or charitable organisation reduced rates may be available.

Payment Terms:

Payment in two parts:

- ◆ 50% of design of basic skeleton — on presentation
- ◆ 50% remainder plus population fee — on publication to ISP (the site may still only be nearing completion at this stage.)
